Professional Summary

Full Stack Developer with 3+ years of experience building scalable web applications using React, Next.js, Node.js, and Python/Django. Proven ability to deliver end-to-end solutions across healthcare, fintech, and SaaS domains. Focused on clean, efficient code driving measurable performance gains in Agile teams.

Skills

Frontend: React, Next.js, JavaScript, TypeScript, HTML, CSS, Tailwind CSS, Figma.

Backend: Node.js, Express.js, Python, Django, Java, C#, C++, ASP.NET Core, .NET, RESTful APIs, Webhooks.

Databases & Cloud: MySQL, PostgreSQL, SQL Server, AWS, GCP, Vercel, Railway.

Tools: Docker, Git, GitHub, Jira, Agile/Scrum, Power BI, Tableau, WordPress, Elementor, HubSpot, CI/CD.

Experience

Full Stack Web Developer

Houston, Texas, USA

Park My Ride, LLC

Jan 2026 – Present

- Developed and deployed a full stack event parking web application using Next.js, Tailwind CSS, and Django, building RESTful APIs and implementing JWT-based authentication for secure user access.
- Implemented an interactive map view rendering homeowner garage locations with parking detail popups and seamless navigation to individual Garage Detail booking pages, using the Home Garage API endpoint for all data.
- Connected the List View and Map Page with event-driven navigation and updated the front-end search bar UI, developing dashboard pages for booking, profile, sign-in, and payment, improving data retrieval by 30%.
- Built responsive email templates and landing pages using WordPress and Elementor based on Figma designs, reducing deployment time by 20% and resolving Agile Scrum tickets to reduce bug rate by 15%.

Software Engineer Intern

Sheridan, Wyoming, USA

Irenix Empowerment Foundation

Sep 2025 – Dec 2025

- Built a HIPAA-compliant EHR platform with role-based access control, ensuring secure and structured data management for 100% of client records and reducing administrative time by 30%.
- Developed an intelligent client-provider matching system with both automated and manual selection modes, improving appointment booking efficiency by 40% and enhancing overall user experience.
- Integrated a comprehensive billing workflow supporting payment models, insurance claim tracking, and refund management, streamlining financial operations and reducing billing errors by 25%.
- Designed interactive dashboards for clients and providers with real-time progress metrics, exportable reports, and full audit log compliance, enhancing data visibility and clinical decision-making.

Software Engineer

Pune, Maharashtra, India

Accenture

Aug 2023 – Dec 2023

- Architected and optimized complex SQL Server stored procedures and indexed queries, significantly enhancing data retrieval performance by 30% for high-volume customer loan records across core banking modules.
- Engineered robust business logic in C# across 10+ loan eligibility validation and repayment tracking modules, ensuring strict adherence to banking compliance standards and reducing processing errors by 25%.
- Spearheaded unit and integration testing for 20+ critical loan disbursement workflows, proactively identifying and resolving 50+ high-priority defects that ensured zero-defect releases across UAT and production environments.
- Performed targeted bug fixes and code enhancements across SQL, C# and ASP.NET Core layers, reducing post-deployment issues by 40% and ensuring consistent system performance.

Full Stack Software Developer

Bengaluru, Karnataka, India

SMC-HNV

Jul 2022 – Jun 2023

- Designed and developed a full stack construction management web application using React.js component architecture, integrating back-end endpoints for real-time data management and reducing scheduling errors by 35%.
- Implemented and integrated 8 RESTful APIs and webhooks to automate appointment booking workflows with real-time conflict detection and dynamic time slot availability, improving overall booking efficiency by 40%.
- Developed and connected multiple dashboard pages including appointments, calendar, and invoice sections with React.js, ensuring seamless user experience and consistent application design with SEO best practices.
- Deployed the application on Vercel and Railway with CI/CD pipeline integration via GitHub, ensuring 24/7 cloud availability and making the application fully accessible on mobile devices from anywhere.

Software Engineer
SMC-HNV

Bengaluru, Karnataka, India
Jun 2021 – Jun 2022

- Developed a web-based cost estimation tool to efficiently calculate and track project expenses against defined budgets, streamlining the overall cost management process and improving financial visibility.
- Implemented secure owner-only authentication with session management and encrypted credentials, restricting system access to authorized personnel only and ensuring data confidentiality.
- Built real-time budget tracking with automated alerts triggered at 80% and 100% spend thresholds, enabling proactive cost control and improving overall budget accuracy by 20%.
- Integrated PDF export functionality and project search to streamline cost reporting and project management for construction operations, reducing manual reporting effort significantly.

Projects

Uber Data Analysis - Tableau, Data Analytics, Data Visualization

- Analyzed 50,000+ Uber ride records with Tableau and Python to identify travel patterns and demand clusters, improving clustering accuracy by 30% using the elbow method and k-means algorithm.

Underwater Image Enhancement - Python, Machine Learning

- Enhanced underwater images using ML models and OpenCV to address low contrast and distortion, improving overall color vibrancy and clarity by 40% while reducing visibility issues in 80% of test datasets.

E-Commerce website - HTML, CSS, JavaScript, PHP

- Developed a scalable e-commerce platform with scheduling, secure data handling, and real-time notifications, effectively reducing manual booking time by nearly 50% and improving overall customer interaction.

Education

Arizona State University — MS in Information Technology

Jan 2024 – Dec 2025

- **Coursework:** Data Visualization, Advanced Big Data Analytics, NLP for IT, Analyzing Big Data.

BVRIT Hyderabad — B.Tech in Information Technology

Aug 2019 – July 2023

- **Coursework:** Networks, Data Structures, Data Analytics, Machine Learning, Web Programming.

Certifications and Badges

- Fundamentals of ML and AI - AWS.
- Foundations of Prompt Engineering - AWS.

Leadership / Extracurricular

Cultural Club Member - BVRIT Hyderabad

- Orchestrated a series of five cultural events that engaged over 200 participants, fostering teamwork and enhancing cultural awareness within the college community through diverse programming.
